App &
Problem

Review
of build
process

Habit Tracking to enable +ve lifestyle habits

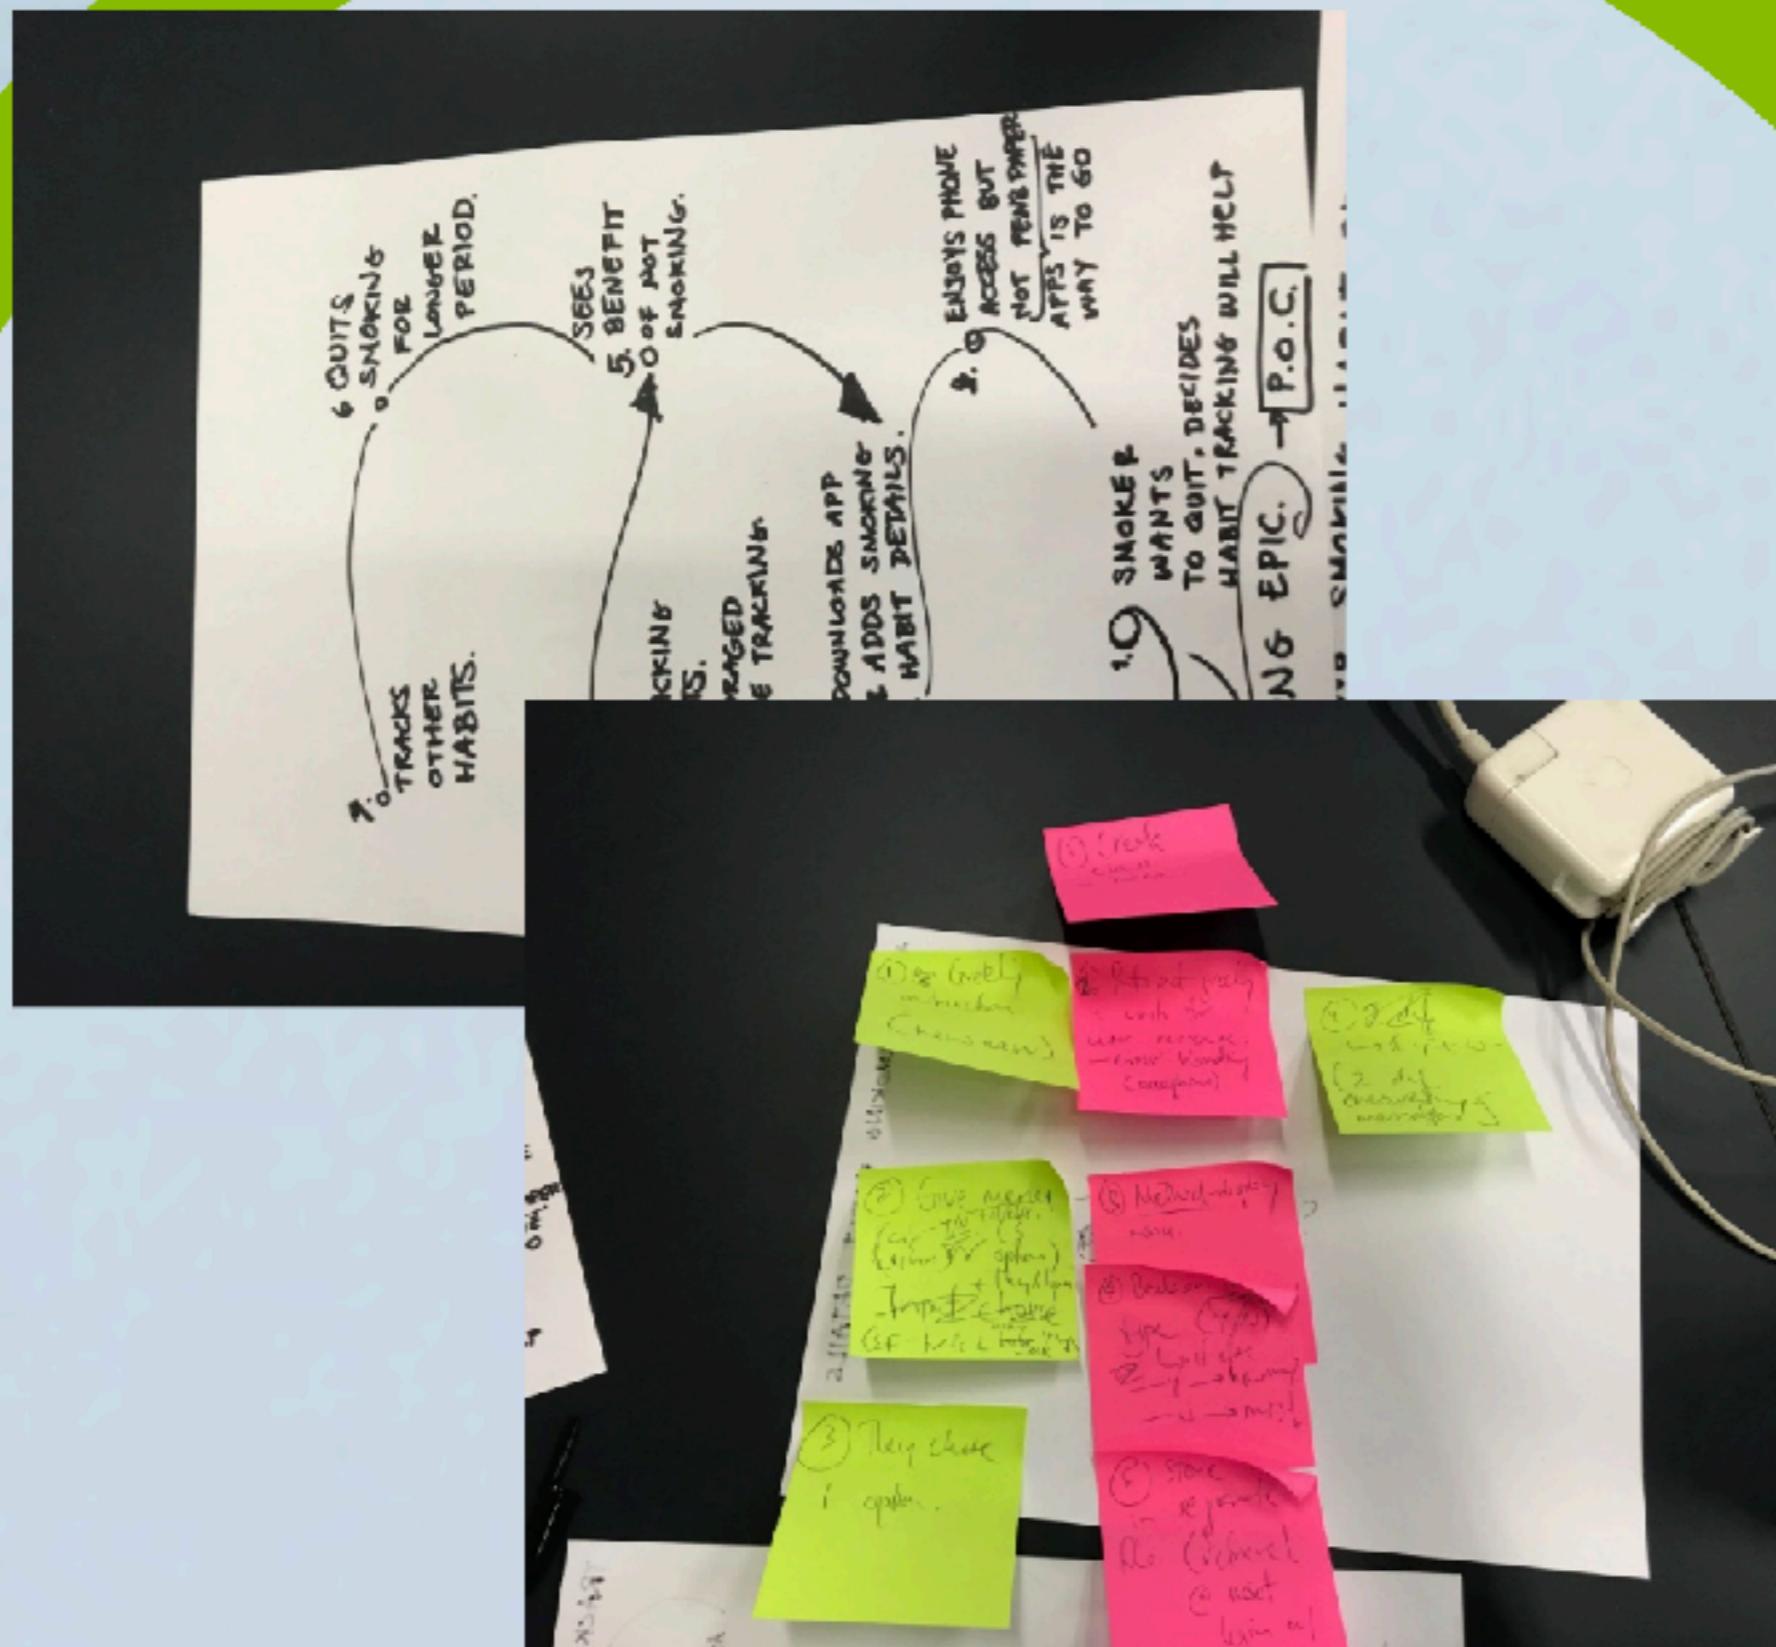

MVP = Enabling user to kick smoking habit.

Focus on tracking 1 habit = keep track of cigarettes smoked in 24 hour period

Review of build process

APPROACH

- user stories
- app workflow
- testing (thought about it)
- coding
- tested
- exceptions
- Rspec test x 3

Functionality

- Input of name
- Track users cigarette intake daily
- Sum of no# of cigarettes smoked
- Short positive messages that rewards positive behaviour.
**Bad words for bad behaviour
(but we wouldn't do this for the real thing of course)

this dude kept breaking our sh**t

Proof we
didn't
waste
day 1

this dude kept
breaking our sh**t

hard stuff

- Exceptions
- Testing (RSPEC)
- Separating stuff into classes

(@Nat found all of it hard
frankly!)

**prickly
stuff**

Prickly stuff (...i.e. ethics) *cough!*

- Privacy (esp collection of health info; we need consent)
- Accessibility (copy & paste job) for WCAG 2.0 and Other W3C/WA

- **Personal insights**

.....**10 points for not
asking a question...**
